

Business Analytics Power BI Dashboard

Customer Engagement & Campaign Analytics - NYKAA

1. Dataset Description

The dataset used for this project is the Nykaa Marketing Campaign Performance Dataset, sourced from Kaggle. It contains detailed records of marketing campaigns run by Nykaa — India's leading beauty and personal care e-commerce platform.

Dataset Source:

<https://www.kaggle.com/datasets/nalisha/nykaa-marketing-campaign-performance-dataset>

Key Variables in the Dataset:

- Campaign Type: Influencer, Social Media, Paid Ads, SEO, Email
- Marketing Channel: Instagram, YouTube, WhatsApp, Email, Google
- Customer Segment: Working Women, College Students, Premium Shoppers, Tier 2 City Customers, Youth
- Metrics: Campaign Revenue, Acquisition Cost, Engagement Clicks, Qualified Leads, Conversions, ROI
- Dimensions: Dates, Campaign IDs, Region/Channel identifiers

The data set enables multi-dimensional analysis across campaign types, channels and customer segments ideal for a comprehensive marketing analytics dashboard.

2. Dashboard Screenshot

The Power BI dashboard below captures the complete Customer Engagement & Campaign Analytics view, including KPI cards, bar charts, a donut chart, scatter plot, and interactive slicers.

Nykaa Customer Engagement & Campaign Analytics Dashboard

Key Performance Indicators

56K Total Campaigns Executed	260M Total Engagement Clicks	104M Qualified Leads Generated
57M Successful Conversions	2.71 Average Marketing ROI	28.66bn Total Campaign Revenue

3. Key Insights

The following five insights were derived through analysis of the Power BI dashboard visuals:

#	Insight	Supporting Visual
1	Influencer & Social Media lead revenue with ~5.8bn each, making them the top campaign types.	Revenue by Campaign Type Bar Chart
2	Instagram drives the highest conversions (3.3M), followed closely by YouTube & WhatsApp (3.2M each).	Top Marketing Channels Chart
3	Working Women & College Students are the highest-revenue segments (~5.8bn each).	Revenue by Customer Segment
4	Marketing Channel Distribution is nearly equal (~20% each), indicating a diversified strategy.	Donut Chart
5	Average Marketing ROI of 2.71 on 28.66bn revenue confirms strong campaign efficiency.	KPI Cards

Insight Details

Insight 1 - Influencer & Social Media Dominate Revenue

Both Influencer and Social Media campaigns generated approximately 5.8bn in revenue each, tying for the top position. Paid Ads also performed closely at 5.8bn. This suggests that content-driven and paid digital campaigns are equally powerful for Nykaa's business model.

Insight 2 - Instagram is the #1 Conversion Channel

Instagram led all marketing channels with 3.3 million successful conversions, narrowly ahead of YouTube, WhatsApp, and Email (all ~3.2M). Instagram's visual-first format aligns well with beauty and personal care products, making it an ideal platform for Nykaa.

Insight 3 - Working Women & College Students Drive Maximum Revenue

Among all customer segments, Working Women and College Students each contributed ~5.8bn in campaign revenue. These two groups represent Nykaa's core audience and should be the focal point of future targeted campaigns.

Insight 4 - Balanced Multi-Channel Distribution

The donut chart reveals a near-equal split across all five marketing channels (roughly 20% each). This balanced distribution indicates that Nykaa has successfully diversified its marketing presence rather than relying on a single channel, reducing business risk.

Insight 5 - Strong Overall ROI Confirms Campaign Efficiency

With an average marketing ROI of 2.71 across all campaigns, Nykaa is generating approximately 2.71x the revenue for every rupee spent on marketing. This high ROI, combined with 57M successful conversions from 260M total clicks, indicates efficient targeting and high campaign relevance.

4. Business Recommendations

Recommendation 1 - Double Down on Influencer & Social Media

Since Influencer and Social Media campaigns deliver the highest revenue (~5.8bn each), Nykaa should increase its budget allocation to these two campaign types, particularly for new product launches and seasonal sales events like Big Beauty Sale and Pink Friday.

Recommendation 2 - Prioritize Instagram for Performance Campaigns

Instagram's leading conversion rate of 3.3M makes it the most effective channel for driving direct purchases. Nykaa should invest in Instagram Shopping features, Reels-based ads, and influencer collaborations specifically on Instagram to maximize conversion efficiency.

Recommendation 3 - Develop Hyper-Targeted Campaigns for Top Segments

Working Women and College Students are the two most valuable segments. Nykaa should create dedicated product bundles, loyalty programmes, and personalized email/WhatsApp campaigns tailored to these segments — e.g., professional skincare bundles for working women and student discount codes for college audiences.

Recommendation 4 - Maintain Channel Diversification with Performance Reviews

While the balanced channel mix reduces dependency risk, Nykaa should periodically review per-channel ROI to identify any emerging under-performers. Channels consistently below the 2.71 average ROI threshold should be optimized or reallocated to higher-performing channels.

Recommendation 5 - Leverage High ROI Periods for Budget Scaling

The average ROI of 2.71 signals that campaigns are highly efficient. During peak seasons (festivals, weddings, summer), Nykaa should aggressively scale campaign budgets, as the returns are likely to multiply. A/B testing campaign creatives across different segments can further improve conversion rates and push ROI above 3.0.
